The Town of Dallas Wastewater Collection System Annual Report

The Town of Dallas operates and maintains an extensive wastewater collection system under permit no. WQCS00165, which covers the Town's corporate limits. The system includes 30.5 miles of gravity sewer lines. These lines consist of ductile iron, terra-cotta, and poly vinyl chloride (pvc). They range in size from 6" to 15" pipe.

The Town also operates and maintains five (5) Duplex Pump Stations. They are located on Trade St., Border St., Dallas Stanley HWY and Oak Grove Mobile Home Park. The Main lift is located at the waste water treatment plant on Ferguson St. The lift stations include 1.6 miles of 8" and 12" force main.

The Town of Dallas only had six (6) non-reportable spills in 2020.
